

Debra Trickey,

Everything that is supposed be, was and is; brilliant service, brilliant float. Thankyou Nathan Trailers, you have designed and produced a float that is wonderful to tow, easy to use and looks great.

The design and construction of this float makes for a travel happy experience for me and the horses. There is adequate room for warm bloods with the roof height providing a feeling of spaciousness. I know the horses are safe because this float is structurally sound. Each time I use this float, I appreciate the ease in every situation. In fact, one day I had to transport a horse with a deep wound to the vet but the chest bar was at the height that would apply too much pressure during transportation. So, it was easily solved, I just lowered the chest bar for the best position for transportation. Incidentally, the removable chest bar could easily be released if weight of a horse is on top of it should there be a panic situation- just one of the many safety features. Indeed, this float is beautiful and stylish. I am enjoying owning this float; this is the float I have dreamt about.
